

Guru Bagawan

Full Stack Engineer & Book Enthusiast | BrainStation Graduate

EXPERIENCE

tilr Corp, Toronto, ON— *QA Lead & Full Stack Engineer*

May 2018 - Feb 2020

- Worked closely with the two product teams to maintain standards across platforms
- Training and managing interns so they are able to conduct manual and automated QA tasks
- Full stack developer for core web app, where I built new features using ReactJS, Ruby on rails, and Neo4j

Key Wins:

- Built out a comprehensive test suite with Cypress IO that provided a full run through and report of a core product with Github and CircleCI integration
- Created and launched revamped marketing site from ground up using PHP. This included Wordpress set-up, Git integration and deployment.

Inkblot Technologies, Toronto, ON— *Full Stack Developer*

Jan - Apr 2018

- Responsible for building out components from the core product, including the form used to onboard new councillors, using ReactJS and Ruby on Rails.

EDUCATION

Brainstation, Toronto, ON— *Web Development Bootcamp*

Jun 2017 - August 2017

- Crash course on development with a focus on MERN stack

Western University, London, ON— *BHsc*

September 2012 - July 2017

Bachelor Of Health Sciences

- Course work in health policy, promotion and economics

PROJECTS

Dr. Robot — *Brainstation Final Project*

I used APIMedic with ReactJS and Node to create a questionnaire that will diagnosis patients based on their symptoms.

SuperHero Showdown — *Personal Project*

In order to understand binary sorting, I built an app that provides the user with a personalized rank by rounds of 1-on-1 choices.
